Art Unit: 3683

1. Claims 1-3 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The claim(s) are so indefinite that no art has been applied to the claim(s)-- See Ex Parte Lyell, 17 USPQ2d 1548, 1552.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kobayashi, Zuercher et al., and Shaw wt al show proximity sensors on vehicles coupled to the braking systems. Rosenberg et al show a brake pedal coupled to a warning system.
